

Medical Device Manufacturing Navigator

As a long-time trusted SAP Global Partner, Navigator Business Solutions partners with SAP to help Medical Device manufacturers operate with greater agility, make faster decisions, and collaborate with increased mobility around their company, the country and the World. Navigator offers complete suite-in-a-box, future-proof SAP solutions to help customers grow while meeting compliance mandates. Navigator then delivers the SAP expertise that our clients trust to enhance their businesses and operate as leaner, smarter and completely compliant companies.

Navigator's industry solutions, including the Medical Device Solution set, are pre-defined SAP Business ByDesign offerings based on Best Practices built for the industry, on more than 10 years of ERP implementations, supporting Mobility, real-time analytics, Quality and the Compliance needs of our customers.

Medical Device manufacturers, regardless of whether they are start-ups or established organizations, have dynamic product life cycles; from development and clinical trials through to distribution and revenue. To get there they often face complex supply chains, a demanding regulatory environment and the need to track everything, and regularly require multi-country compliance and reporting.

SOLUTION HIGHLIGHTS

SAP Business ByDesign

Features

- Financials and Analytics

STANDARD

Industry Specific Package

Approach

Ideal for organizations that want to get started quickly, get the solution up and running and then grow the system as their business grows. Perfect for pre-revenue, clinical trial or recently FDA approved companies that need to transition from their entry level accounting system and spreadsheets to a full platform solution that want to take a Best Practices approach to the implementation.

Organization

20 users, 1 location

Services

Navigator's proven Fixed Scope/Fixed Fee Implementation Methodology that includes five phases: Prepare, Fine Tune, Test, Go-Live and Post Go-Live provides a roadmap for a rapid implementation. It employs a true partnership model with customer that provides the right level of guidance and engagement to ensure success.

Implementation Time

As quickly as 90 days

Price Point

\$100,000 - \$125,000 implementation

Per User Subscription

\$16 to \$192 per month depending on access level

Platform

Cloud

ENTERPRISE

Custom Package

Approach

Ideal for more established organizations with complex supply chains, industry and government compliance regulations and where business automation, financial visibility and analytics are core requirements. This Best Practices approach provides additional services to assist with change management, specialized procedures and report and enhanced implementation support.

Organization

20 - 1,000 users, multi-locations, multi-entity, multi-country

Services

Navigator's proven Fixed Scope/Fixed Fee Implementation Methodology that includes five phases: Prepare, Fine Tune, Test, Go-Live and Post Go-Live provides a roadmap for a rapid implementation. The Enterprise approach augments the Go Live Experience with additional services such as procedures and testing, enhanced training, data migration assistance and change management. Again focusing on providing the right level of guidance and engagement to ensure success.

Implementation Time

16-24 weeks

Price Point

Customized based on the Scope of implementation

Per User Subscription

\$16 to \$192 per month depending on access level
