BIO PHARMACEUTICAL MANUFACTURING NAVIGATOR

Pharmaceutical Manufacturing companies come to Navigator when they find their ability to grow and or adapt is being limited by their current processes and systems. Some startups are running their startup systems consisting of Quickbooks and Excel and others mature businesses run a group of disconnected systems that need to be patched together with manual steps to get the job done.

Bio Pharma manufacturers, regardless of whether your company is a start-up or established operation; we understand the challenges of working with in dynamic product life cycles; from development and clinical trials through to distribution andrevenue - all while maintaining compliance with regulatory requirements.

We work with you to understand where you are in your business trajectory, what your unique challenges are, and collaboratively identify the correct solution fit and partner with you to implement a configured ERP platform for business reality and future growth.

Not all Pharmaceutical Manufacturing companies need the same ERP configuration to achieve optimal performance. Navigator has developed a solution package consisting of features that meet the needs of industry customers out of the box. This solution set has been developed through more than 13 years of industry experience, delivering integrated SAP Business ByDesign offerings configured to our clients current and future needs.
