

WAREHOUSE MANAGEMENT SOFTWARE

The way you
need it to work.

Navigator Business Solutions' **LOXODO WMS** offers a unique solution to optimize your warehouse; combining a purpose-built cloud platform based on the latest technology, with years of Supply Chain experience solving small to midsize wholesale/distribution companies' challenges like yours.

The solution is specifically built to extend SAP Business ByDesign and SAP Business One ERP through your warehouse to organize, optimize and streamline the end-to-end processes and visibility into your organization.

Loxodo WMS will:

- Increase Productivity
- Decrease Cycle Times
- Increase Accuracy
- Decrease Picking/Shipping Errors
- Increase Warehouse Space Utilization

Loxodo WMS delivers the tools for your warehouse team to have the right product, at the right place, at the right time - providing your business the needed agility to meet ever changing customer demands.

CHALLENGES

CFOs - How much cash is tied up in inventory? Think of it as stacks of dollar bills on pallets in the warehouse.

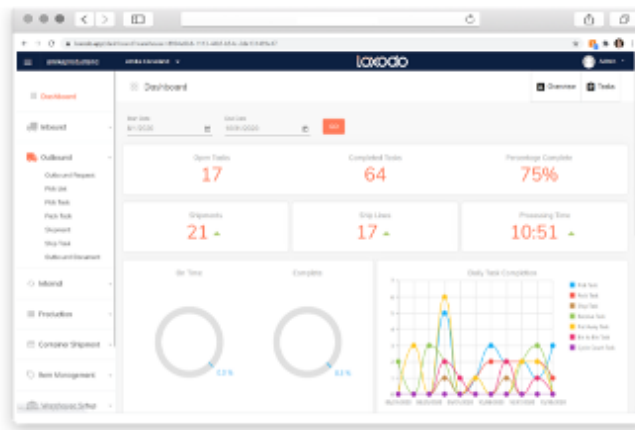

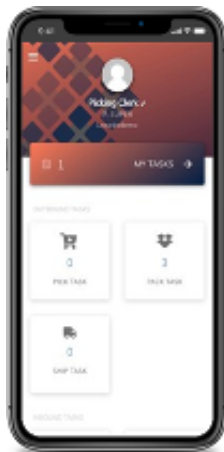

COO - How is my inventory turning? Can we ship what we are selling?

Warehouse Manager - How productive are my people? Are deliveries and orders being processed accurately? Do I have the right stock in the right place to handle my volume?

CRO - Does your Sales Team know what is available, sold or pending, in real-time?

Loxodo WMS has solved our clients common pain points:

- Processes that are Out of date and don't match customer's requirements
- "Special Programs" / Workarounds that create more work
- Missed orders
- Incorrect stock shipped on orders
- Undocumented Broken/lost inventory
- Returns handling
- Difficulty handling Sales Kitting
- Physical Inventory are not matching the system
- Just doesn't integrate well with their ERP (On Prem, Cloud Hosted, or SAP HANA)
