

SAP Business ByDesign, Public Sector Edition

An Affordable ERP Solution to Support the Requirements of Public Sector Organizations

Lay a **Solid Foundation** for Your Public Sector Organization

Small and midsize public sector entities have the same need for robust and functionally rich enterprise resource planning (ERP) solutions as their larger counterparts. Unlike those larger entities, small and midsize public service organizations have limited resources, both in budget and people, and these resources get squeezed year after year.

Regardless of size, all public sector organizations face mounting pressures, including:

- Increasing constituent expectations for higher quality services
- Demands for stricter accountability and greater transparency
- Ever-changing governmental reporting and funding regulations to which they must comply
- Islands of legacy information not integrated into a single IT landscape, resulting in inefficient operations, inaccurate data, and inadequate support for strategic decisions

HOW YOUR **PUBLIC SECTOR ORGANIZATION** **BENEFITS**

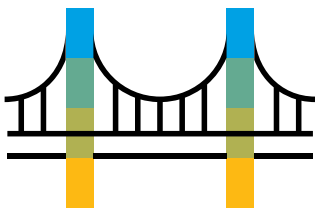

The SAP® Business ByDesign® solution is a cloud-based ERP software as a service that connects every function of your organization to proven best practices and in-depth analytics. You'll get the foundation to scale without the complexity and cost, so you can pass the benefits you gain on to your constituents.

ERP Software in a Box

SAP Business ByDesign is a cloud-based, comprehensive business solution built from the ground up with flexible business processes based on best practices from thousands of organizations. Instead of functioning with multiple systems, eliminate the silos impeding productivity and consolidate your operations in a single solution. This eliminates duplicate data entry while cleaning up redundant information throughout your organization. Its delivery in a simple, quick-to-implement package helps you dramatically improve your operations.

Transparency and Accountability

SAP Business ByDesign meets the specific needs of your organization, whether it's a local government, school board, or an education and research institute. Combining standard finance functions with features specific to public sector interests, SAP Business ByDesign is ideal for streamlining your daily operations and facilitating encumbrance accounting, fund accounting, and reporting. While compliance with today's regulations is important, you know the regulatory landscape will continue to evolve. Leading-edge technology from SAP can help ensure that your organization has the built-in flexibility, accountability, and transparency to comply now and in the future.

Get enterprise software that has you covered, now and in the future.

Insightful

With SAP Business ByDesign, analytics aren't an add-on, they are embedded and a part of every process so you get full transparency into every aspect of your organization to make the right decisions. You can see where the organization needs to adapt and improve. You can then move forward with the right tools to make adjustments quickly to provide greater accountability.

Continuous Innovation

SAP Business ByDesign is a safe, smart choice – backed by SAP and with a proven track record of ongoing investment, innovation, and delivery in the cloud. SAP consistently delivers new features and processes through quarterly product updates to allow you to take advantage of the latest innovations.

IMPLEMENTATION

Delivered by authorized SAP channel partners, SAP Business ByDesign is preconfigured, rapidly deployable, and competitively priced.

TAKE THE NEXT STEP

You can buy SAP Business ByDesign, public sector edition, from an authorized SAP channel partner. These partners combine their industry knowledge and IT expertise to help you purchase, implement, and support SAP solutions.

A TRUSTED PRESENCE

SAP has been focusing on the enterprise resource planning (ERP) needs of public sector organizations for over 20 years. The SAP® Business ByDesign® solution is proof of that dedication, focus, and expertise. Widely adopted by businesses and organizations worldwide, the solution:

- Is in productive use in over 4,000 small and midsize organizations
- Supports 19 country localizations and 8 languages
- Runs productively in over 95 countries
- Is supported by over 250 authorized partners
- Can be enhanced by over 100 add-on solutions

BUDGETING, ENCUMBRANCE ACCOUNTING, AND ACCRUAL REPORTING

“SAP Business ByDesign multiplies the capabilities of our finance and project teams while improving the efficiency of critical processes and reporting. By reducing the time spent on administration, we can concentrate more on scientific activities that can advance the development of lifesaving vaccines.”

Dr. Odile Leroy, Executive Director, European Vaccine Initiative

About Navigator Business Solutions:
