

Are you evaluating the next step in your business system's transformation?

Think SAP is too big, rigid, complex for your company?

We'd like to introduce you to SAP's answer to that question,

SAP S/4HANA Cloud, public edition

Safe & Secure in the SAP multi-tenant data centers.

- ▶ Includes proven best practices and business processes for your industry.
- ▶ Provides real-time and personalized business insight available from anywhere.
- ▶ Enables intelligent automation across your end-to-end operational processes.
- ▶ Supports regulatory requirements with company-wide controls and in-depth reporting.
- ▶ Built-in global standards for compliance and security keeping you up to date.
- ▶ Scalable continuously bringing new value to your business.

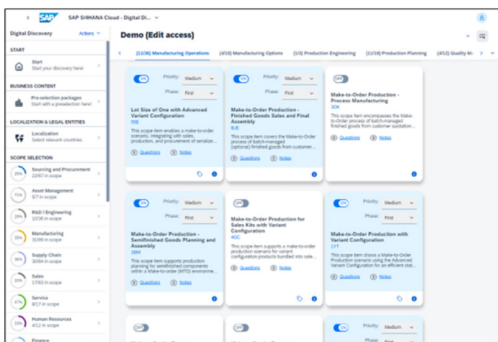

Whether you are implementing an ERP for the first time or migrating from an existing system (collection of systems) to the cloud, SAP Cloud ERP delivers a complete solution with the Automated Processes (supported by AI, ML & RPA) and analytics capabilities to move your business forward.

Navigator and SAP expertise delivers the depth of industry capabilities companies require and the cloud benefits they want.

Better...Faster

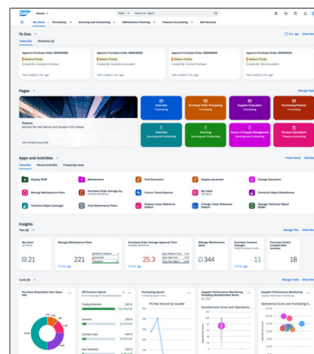

Implementation, adoption and scale

Run with fit-to-standard, industry best practices by applying pre-configured processes that are ready-to-go
Pre-configured best practices...

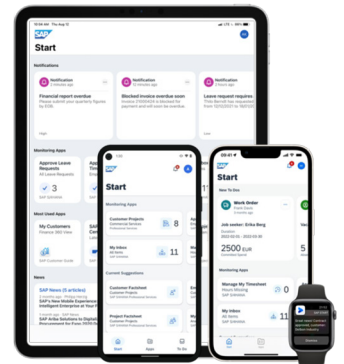

...capture 50 years of ERP and industry experience in a full-featured SaaS cloud ERP solution that speeds time-to-value.

Collaborative, personalized UX...

...built around the best practices to simplify interactions and to guide users to the most impactful actions.

Intelligent Automation...

- ✓ Discover
- ✓ React
- ✓ Automate

...by combining end-to-end best practice processes with intelligent technologies to drive efficiencies.

■ FINANCE

- Accounting and Financial Close
- Receivables and Payables Mgmt.
- Cost Mgmt. & Profitability Analysis
- Treasury & Working Capital Mgmt.
- Governance, Risk and Compliance

■ PROCUREMENT

- Ariba Buying
- Operational Procurement
- Central Invoice Management
- Procurement Analytics

■ SALES

- Sell, Deliver, Bill, and Monitor a Combination of Physical Goods and Services as one Solution Offering
- Sell from Stock & Sell Services
- Convergent & External Billing

■ SERVICE

- After-sales Services with Contracts, Requests, Orders, Deliveries, and Billing with Cost Controlling and Revenue Recognitions
- Combine Sales & Services as Packaged Solution Offerings

■ CROSS FUNCTIONS

- Extensibility and Integration
- Embedded Analytics
- Situation Handling

- Service-Centric Industries (e.g. Professional Services, Media, EC&O, Public Sector)
- Product-Centric Industries (e.g. Mill Products, Industrial Manufacturing, High Tech, Automotive)

Innovate with built-in intelligent technologies:

- ▶ Artificial intelligence (AI)
- ▶ Machine learning
- ▶ Robotic Process Automation (RPA)
- ▶ Advanced analytics

Get tailored recommendations for tangible process improvements

Run business profitably by removing process inefficiencies

Reduce process variations and manual work

Simulate processes for alternative business scenarios

Integrations & Extensions thorough SAP Business Technology Platform (SAP BTP)

Turnkey Systems Growth

The BTP is a technology platform that brings together data and analytics, artificial intelligence (AI), application development, automation, and integration in one, unified environment.

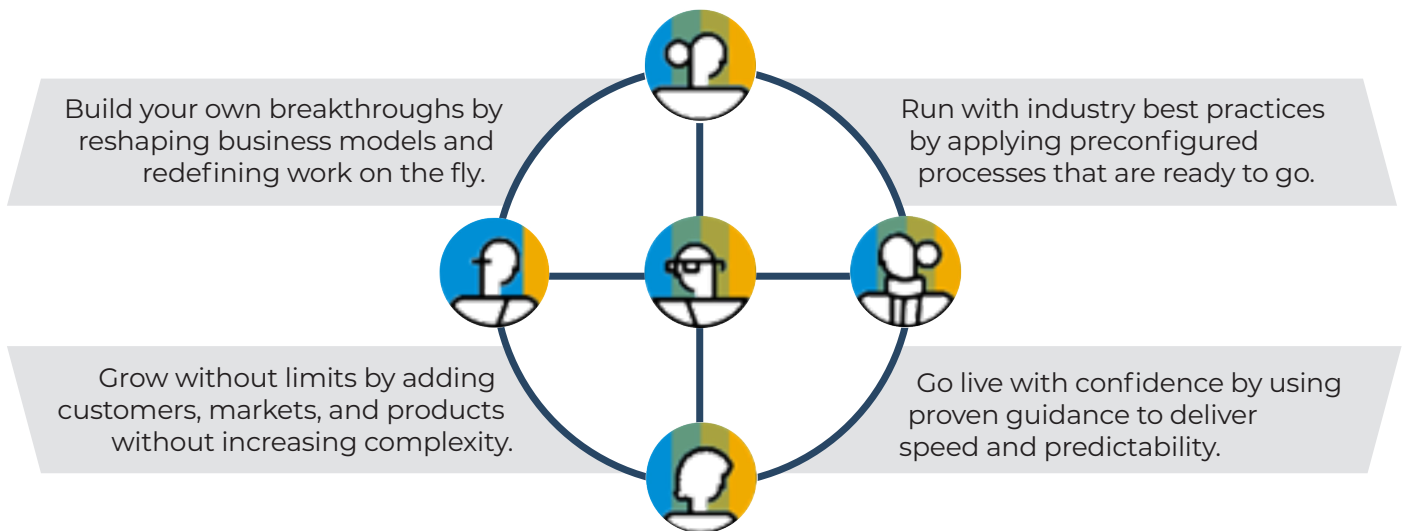

Better Agility and Faster Adaptation

Businesses can grab the functionality they need from BTP and evolve their backend more quickly to changing conditions because the new model is completely modular and software functionality is universal instead of specific to their ERP instance. Companies can take advantage of the more than 750 different modules that are used across the BTP platform.

Improved Integration and Connectivity

Cloud-based SAP solutions always have come with wide integration and connectivity with other systems because ERP serves as the nerve-center for a business. But BTP takes integration and connectivity to an even higher level because the platform is built around APIs and integration points that connect platform modules and external software solutions.

KEY BENEFITS

Who is Navigator Business Solutions?

Organizations come to Navigator Business Solutions when they find their ability to grow and adapt is being limited by their current business processes and systems.

Navigator brings more than 15 years of experience delivering services and solutions to improve the way you work with flexibility & scalability to bolster the efficiency of your entire organization, no matter the size.
