Feature-rich web portals

Easily build web portal solutions to your exact business requirements and branding by using our flexible and scalable web portal template. Applications Platform's point and click, drag and drop configuration tools enable you to radically reduce development time and resources, simplify delivery and deployment, and accelerate time to market.

Effortlessly share information

Provide authenticated or non-authenticated visitors with 24/7 self access to information, such as orders, invoices, deliveries, credit memos, statements and documents.

Powerful automation

Improve decision making and customer relationships by automating essential data and administration tasks with a complete integration and automation engine.

Easy online transactions

Simplify customer payments by providing them with a secure area to make credit, debit and ePayment transactions via PayPal, Sage Pay, Stripe, WorldPay etc.

Additional web portal template features

Remove administration: Reduce internal email traffic to source information, as well as remove back office administration of data collected 'off site' by automating data processing.

Advanced customisation: Easily modify fields and pages to meet your exact business requirements. Use custom CSS styles to replicate your organisation's branding and business processes, including read/write information with support for high load volumes.

Connecting to your current systems

Connect to practically any data source via ODBC, OLEDB, Web Services or an extensive range of supported 3rd party APIs through connectors. Just a few of the software vendors we work with include SAP Business One, Microsoft Dynamics, Access, Sage, Epicor, SYSPRO, Infor CRM, Xero, HubSpot, Dotmailer, DPD, Mailchimp, Magento, Shopify, WooCommerce etc.

All the tools and features to quickly build and roll out a web portal that your organisation needs

- Accessible: Flexible template to create your portal quickly
- Intuitive UX: Take the complexity away by using the quick create wizard walk through.
- Rapid: Retrieve data sets from within portals no matter the size
- **Scalable**: Peace of mind knowing that your portal can cope with any volume of users
- Affordable: One price. Unlimited possibilities

- Customisable: Custom CSS styles replicate your organisation's branding and business processes
- **Mobile ready**: Develop web portals that work instantly, on any device, in any location
- PaaS: Fully hosted environment for you to quickly and easily build your portal
- Full support: Support and advice a phone call away

What security and authentication does Applications Platform provide?

Applications Platform equips your business with multiple, flexible levels of authentication and security, allowing you to determine how users access information and how they are recognised.

All web pages benefit from Secure Sockets Layer (SSL) and Hyper Text Transfer Protocol Secure (HTTPS) for complete peace of mind.

Other security features include: Single Sign-On, LDAP, Password Expiration Policies and IP Whitelists, which enable the administrator to control application access with incredible precision.

Learn more about Applications Platform

We believe true value comes from commercial experience and knowledge to provide you with end-to-end business solutions that are fit for purpose. Applications Platform is driven by an experienced group of people who share the same vision: to make application development faster and more accessible to a wider range of people.
